KEY ACHIEVEMENTS

- Built a full-stack Electric Scooter Booking System (React, Java Spring Boot, PostgreSQL) during a Gadgeon internship, covering listings, bookings and REST APIs.
- Engineered a Java utility that converts binary data into JSON, improving data handling and backend processing efficiency.
- Completed two web development internships (Gadgeon, Coding Samurai) spanning Java full-stack and React front-end work, 2025 - 2026.
- Delivered 3 projects across two stacks (React/Spring Boot/PostgreSQL and PHP/MySQL) plus a published portfolio site.

PROFILE SUMMARY

Full-stack developer who builds web applications end-to-end with Java Spring Boot, React, Python and relational databases, from REST API design to responsive interfaces. Has completed two internships and delivered projects on both PostgreSQL and MySQL backends. Currently pursuing an MCA in AI & Data Science and applying UI/UX design training to build products that are well-engineered and easy to use.

CORE COMPETENCIES

Backend Engineering: Java, Python, Spring Boot, REST API design, authentication and booking logic, CRUD operations, session management, PHP

Frontend & UI/UX: React, JavaScript, HTML, CSS, responsive web design, component-based architecture, wireframing, prototyping

Data & Databases: Python, PostgreSQL, MySQL, relational schema design, data persistence, binary-to-JSON data conversion

EDUCATION

Master of Computer Applications (MCA) - AI & Data Science, D Y Patil University, Pune, 2025 - Present

Focus: AI, data science with Python, software engineering and full-stack application development.

Bachelor of Computer Application (BCA), SCMS School of Technology & Management, Kerala, 2022 - 2025

Focus: programming, databases, web development, software engineering and application development.

PROFESSIONAL EXPERIENCE

Web Development Intern | Coding Samurai, Remote, Jan 2026 - Feb 2026

- Built responsive web pages with HTML, CSS, JavaScript and React in a one-month internship, applying component-based architecture to project implementation.

Web Development Intern | Gadgeon, Kochi, Kerala, Jan 2025 - Apr 2025

- Full-Stack Development:** Built an Electric Scooter Booking System with React and Java Spring Boot, connecting a responsive UI to REST APIs via Axios.
- Backend & Data:** Managed scooter listings, booking management and database operations in PostgreSQL.
- Tooling:** Engineered a Java utility to convert binary data into JSON, improving data handling and backend processing efficiency.

SELECTED PROJECTS

E-Scooter Rental System - Full-stack platform to browse, book and manage vehicle rentals

React · Java Spring Boot · PostgreSQL · Axios

- Designed scalable RESTful endpoints in Java covering user authentication, booking states and data persistence.
- Developed the rental flow so users can browse, book and manage vehicles online.
- Planned next modules: real-time charging station mapping and automated billing integration.

Online Bookstore Management System - Web marketplace for exchanging and purchasing books

HTML · CSS · JavaScript · PHP · MySQL

- Built the marketplace with intuitive user interaction flows for book exchange and purchase.
- Implemented CRUD operations, secure user session management and relational database schemas.

Interactive CV Portfolio Website - Responsive personal portfolio ([bhawri.netlify.app](#))

- Designed and developed an interactive portfolio presenting skills, projects, internships and education, optimized for desktop and mobile.

CERTIFICATIONS

UI/UX Design Training, Skill Orbit, Feb 2026 - Mar 2026

- Covered wireframing, user-centered design, interface prototyping, typography, color theory and layout, producing user-friendly interface concepts.

TECHNICAL SKILLS

Languages & Frameworks: Java, Python, Spring Boot, React, JavaScript, PHP, HTML, CSS

Tools & Platforms: GitHub, Postman, VS Code, Node.js

Web & UI: REST APIs, Responsive Web Design, Frontend Development, UI/UX Design

Databases: PostgreSQL, MySQL, pgAdmin, phpMyAdmin
